

GENEVA DOUBLE CURTAIN

GRAPE TRELLIS

- Easy installation saves you time and money
- No holes to drill . . . brackets clamp to posts
- Adjusts to posts from 3" to 5" in diameter
- Simple double-lock clip holds wires securely

Wolverine is the double curtain trellis with the time and dollar-saving difference. There are no holes to drill. Instead, a sturdy bracket clamps trellis to post, actually adding to the strength of posts. And it's adjustable to fit posts from 3" to 5" in diameter. Holes are provided for anchoring bracket to post at selected height with roofing nails, until nuts can be drawn up tight. Spurs on lower corners of trellis arms add further holding power. Wires are easily attached by means of double-lock clips. Trellis arms are constructed of heavy gauge metal with durable galvanized finish for years of trouble-free service.

Save time, money and trouble . . . order your Wolverine Trellises, today!

GENEVA DOUBLE CURTAIN

GRAPE TRELLIS

NEW

DOUBLE CURTAIN TRELLIS FOR STEEL POSTS

- Fits all standard T-section steel posts.
- Fast, easy installation; improved design for greater strength.
- Mounting bracket slips over top of post, fastens securely by tightening three nuts.
- Slots in bracket rest on post top so arms can't slip down post.
- Wires are easily and firmly attached with double lock clips.
- Trellis arms and mounting bracket constructed of heavy gauge metal with galvanized finish for years of trouble-free service.

Start trimming your trellis costs today by ordering Wolverine Steel Post Trellises!
